Utilize "MediaBrowser"! - Usage Example -

See actual examples to use "MediaBrowser" for purposes other than storing video.

Save Recorded Videos (Backup)

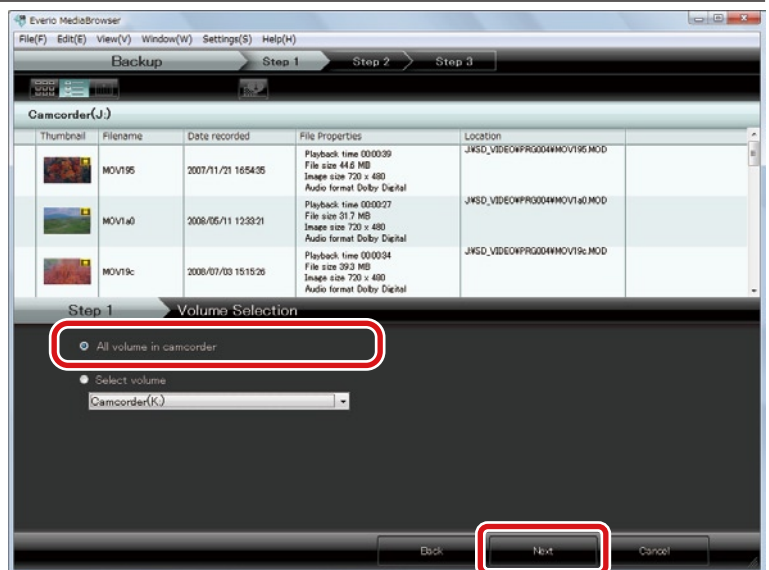

1. Connect the camcorder to the computer.

2. Select [BACK UP] in the camcorder menu.

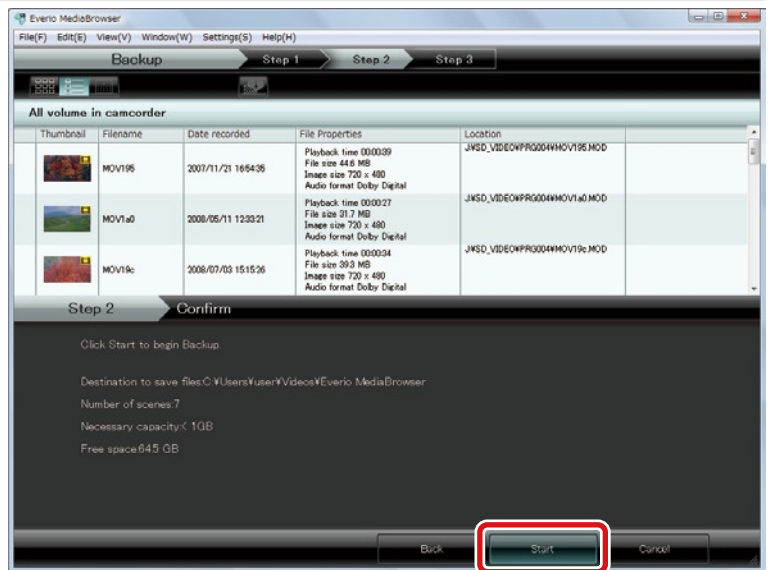

➔ "MediaBrowser" Backup screen will be displayed.

3. Select "All volume in camcorder" and go to the next step.

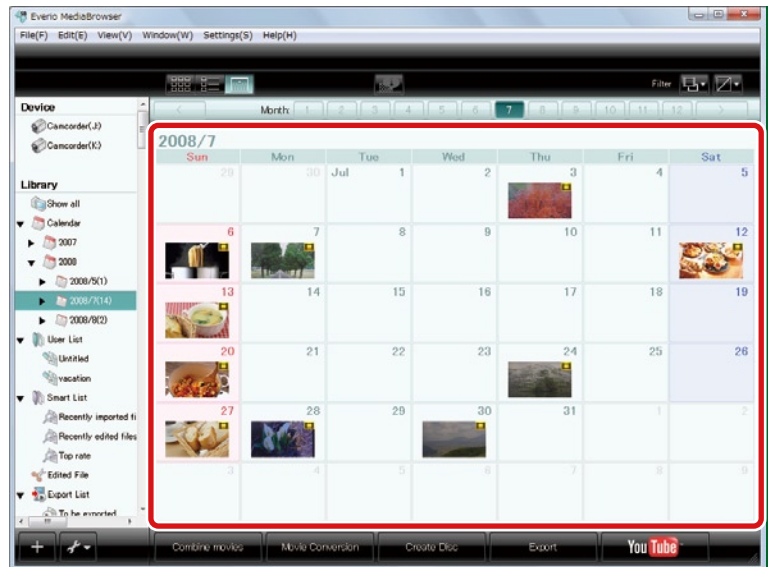

3. Click [Start] to start the backup.

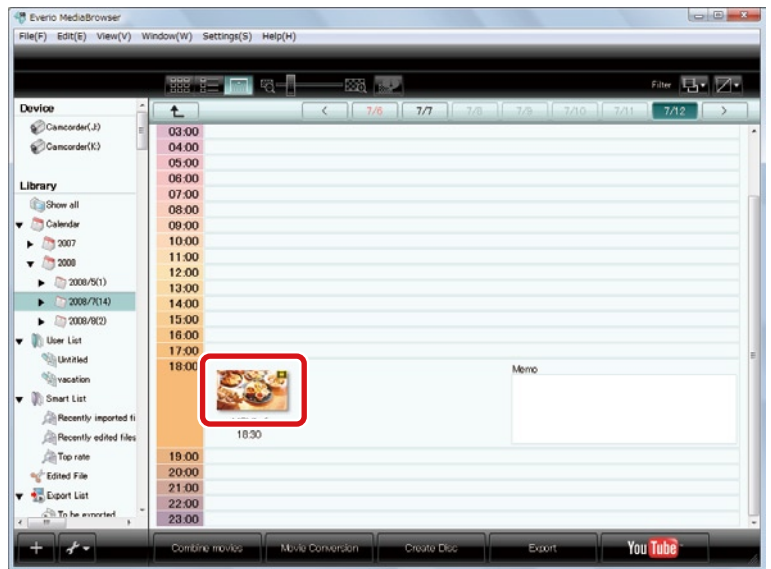

➔ The finishing message is displayed and the video files are displayed in "MediaBrowser" Library.

View Birthday Party Videos

1. Click the date of the birthday.

2. Double-click a video file.

➔ The preview screen is displayed and playback is started.

 The calendar view helps you easily find birthday videos from last year or the year before.

Keep a Cooking Class Diary

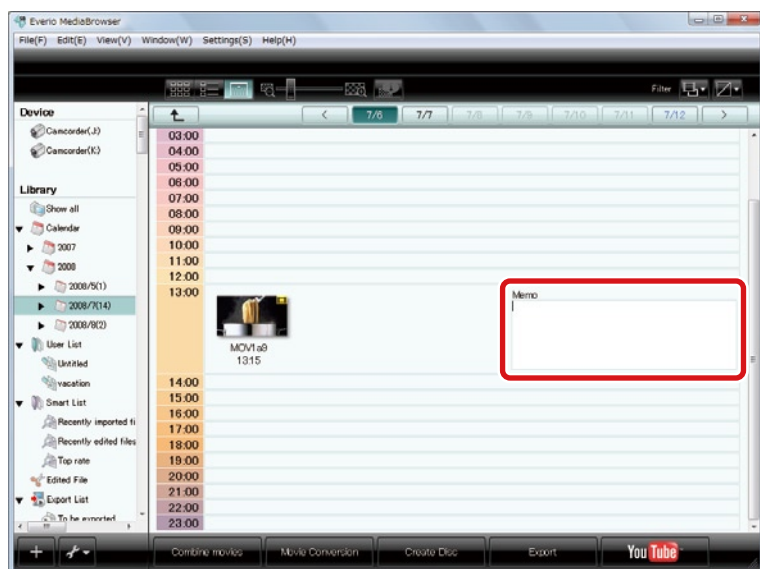

Let's keep a diary entering comments to video files you just saved!

The diary will help you review classes and video collection of cooking classes easily.

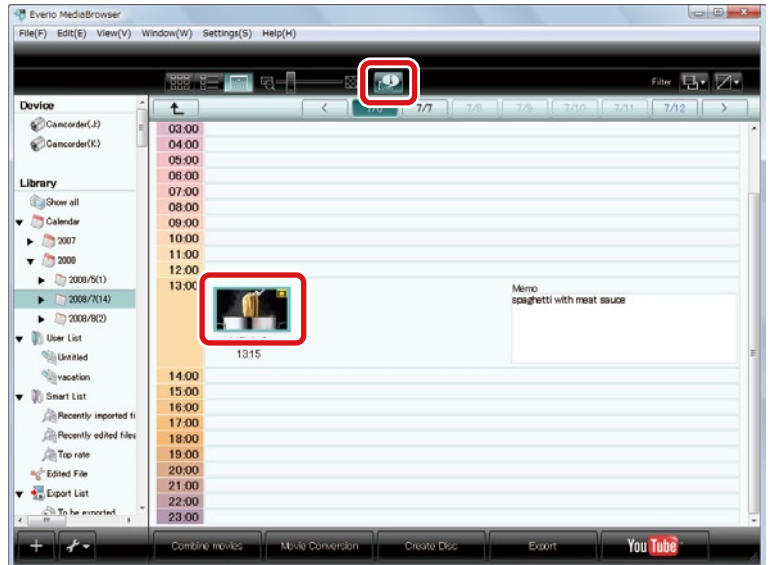

1. Double-click the recording date.

2. Enter name of the dish, preparation method, tips, etc. in the "Memo".

3. Select the video file and click [].

4. Click the [Option] tab and set items 1 through 3.

- ① Change the image thumbnail to the finished image dragging the slider.
- ② Enter "Spaghetti" in the Title.
- ③ Enter "Cooking class" in the Comments.
- ④ Click [] to close the File Information panel.

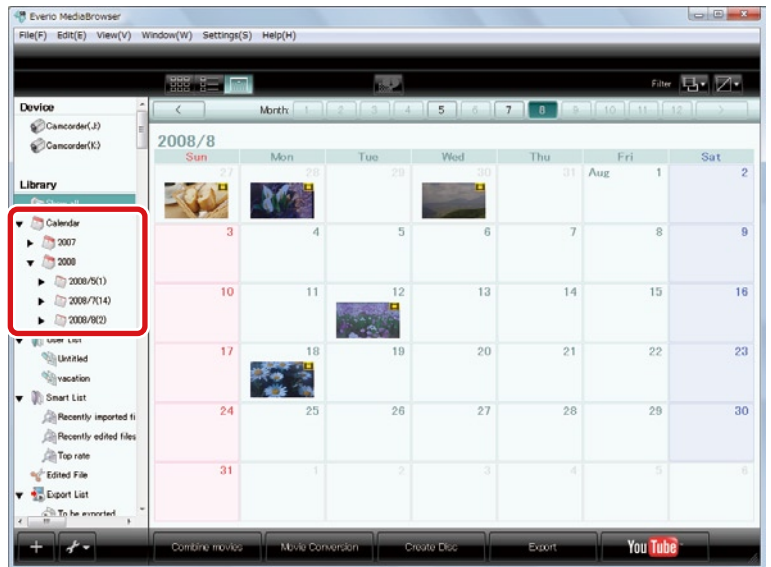

➔ The diary for this time is complete! Enter comments, etc. for other video files.

 Contents entered in "Comments" can be utilized when creating smart lists.

◆ Reviewing

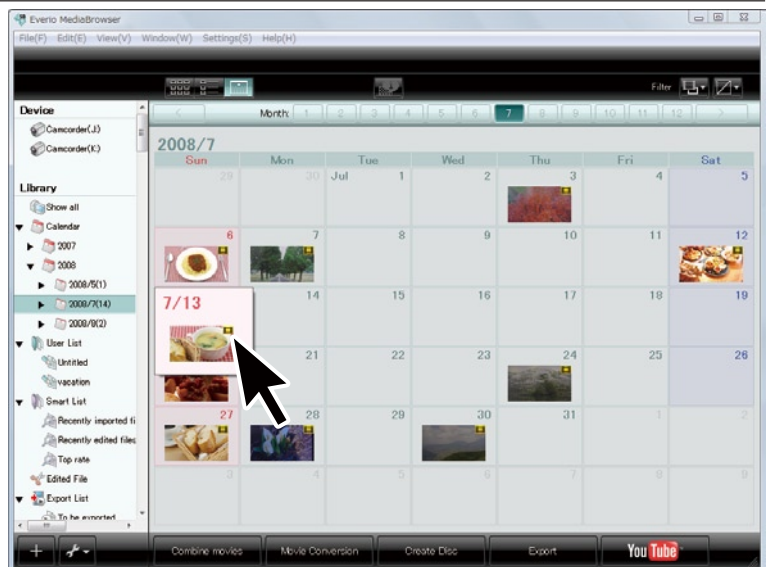

1. Click "2008/7" in the Calendar of the Source pane.

※ For the videos recorded in July 2008.

2. Look for the video file you like to watch.

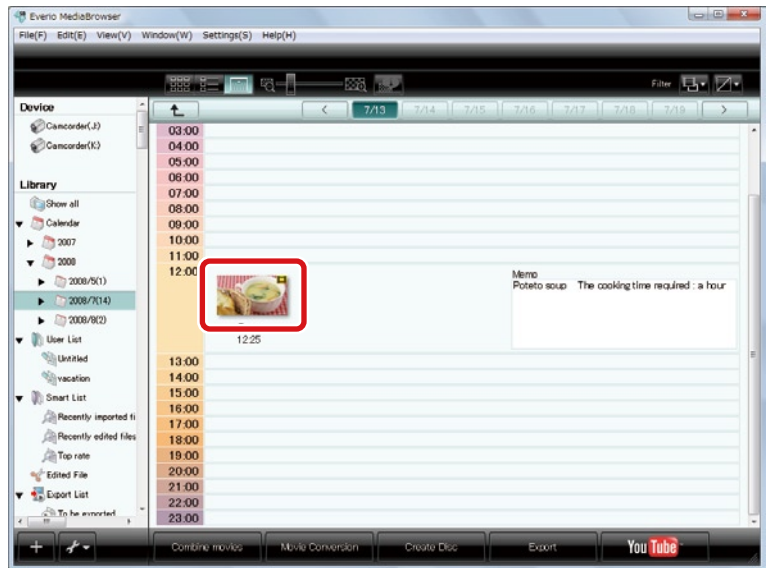

- 1 Put the cursor on dates and check the video thumbnails.
- 2 After you find the video, click to go back to the normal calendar view.

3. Click the date in which the video you like to watch is included.

➔ The calendar for the date is displayed.

4. Double-click a video file and check the preparation method.

 Be sure to check the tips in "Memo".

➔ The preview screen is displayed and playback is started.

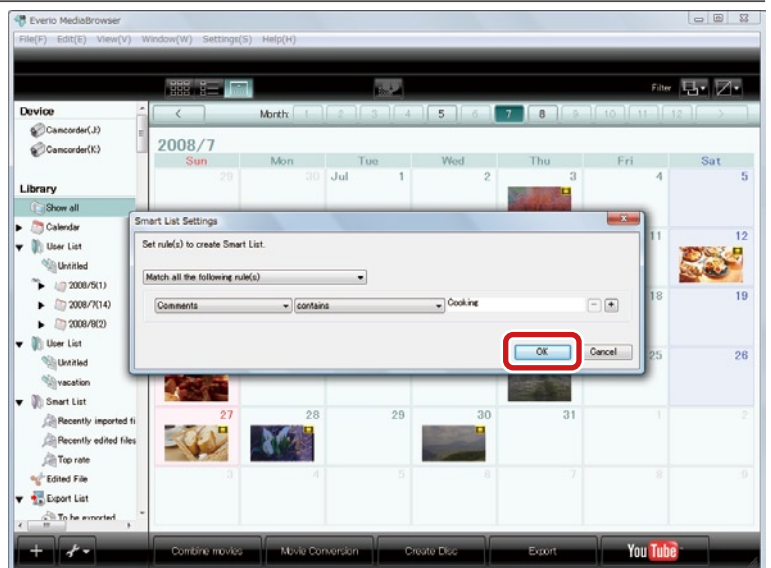

◆ Collecting Cooking Class Videos Automatically

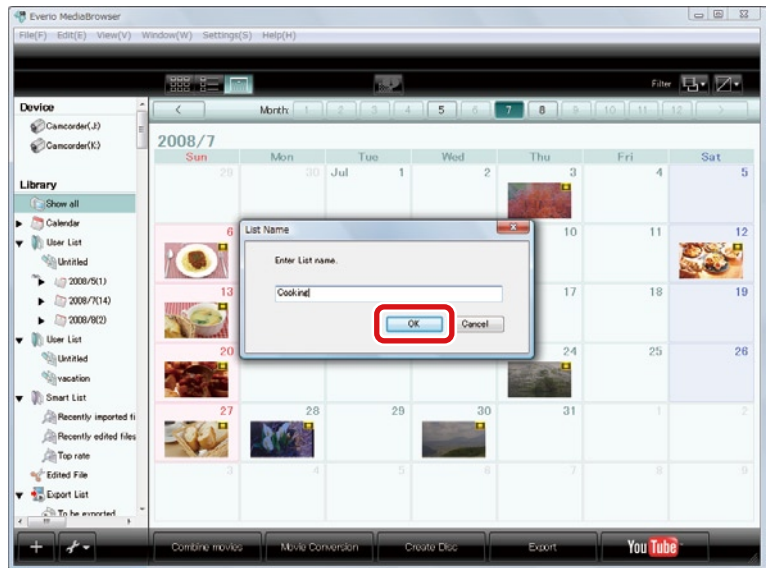

1. Add a new smart list.

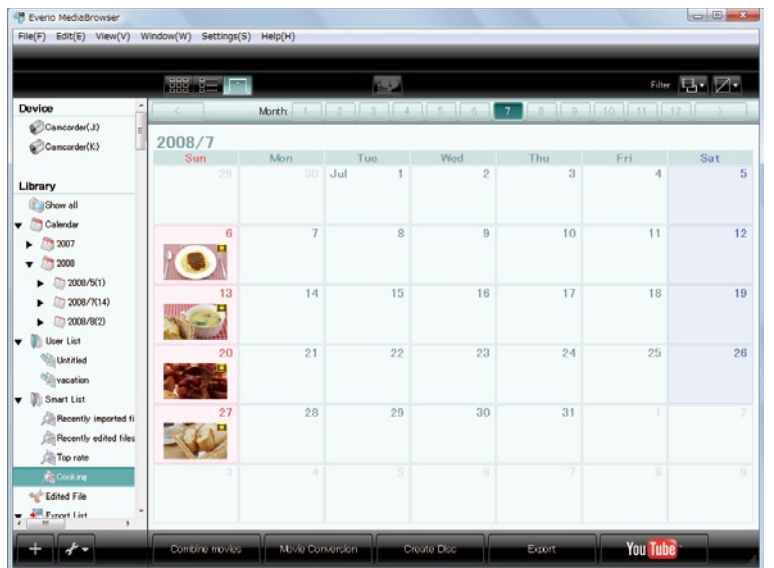

2. Set the criteria as follows and click [OK]: "Comments" "contains" "cooking class".

3. Enter the list name as "Cooking class" and click [OK].

4. Select "Cooking class" of the Smart List.

➔ All video files with "Cooking class" in "Comments" are displayed in the browser pane.
